

蟲 Archetype Lines & Effects

Reverend Insanity Autobattler - all 13 archetype lines and their effect at every rarity (Common -> Immortal).

How archetype lines work

Every character carries exactly ONE archetype line (canon-assigned by name, or chosen at new-game). The line's bonus is TIER-SCALED to the character's own RARITY - a Common holder gets the weak rung, an Immortal the strongest. The epithet (display name) also changes per rarity, e.g. a Wall reads "Shieldbearer" at Common and "Immovable World-Root" at Immortal.

Three effect shapes: (1) SELF - a per-unit stat bonus folded straight into the character's combat stats (most lines). (2) TEAM AURA - Warden / Commander / Mender buff the WHOLE team once at battle start (Mender instead heals + cleanses on its own action). (3) GU AMP - the Adept multiplies EVERY equipped Gu's effect, any path. A leading - (e.g. the Slayer's -8% DEF) is a deliberate flaw.
